PROFILE

Honors Data Science student at the University of Minnesota, Twin Cities. Strong foundation in mathematics, statistics, and programming. Hands-on experience applying SQL, Python, and relational database systems to real-world business problems, with current experience building machine learning models in a professional data science internship using industry standard ML tools.

EDUCATION

University of Minnesota — College of Science and Engineering

Expected May 2027

B.S. Data Science | Honors | 5x Dean's List | GPA: 3.87

Moorhead High School

2023

Valedictorian | GPA: 4.00 Unweighted

EXPERIENCE

Polaris Inc.

Summer 2026 – Present

Data Science Intern

- Built a predictive risk model achieving over 95% accuracy with a four-week forecast horizon, outperforming legacy tool
- Built and validated various models using Snowflake SQL, Python, Databricks, DataRobot, and Snowflake
- Partnered with stakeholders to translate objectives into ML model requirements and flexible code improvements
- Presented findings, results, and model overviews to business users to drive synchronization and trust between tools and users

Polaris Inc.

Summer 2025

Data Analyst Intern

- Summarized and presented 10+ years of inventory and registration data using PowerBI to management to synchronize cross-functional teams
- Decreased overall enterprise storage cost by reducing report sizes by an average of 35% through optimized query design
- Cleaned, analyzed, and validated source of truth datasets to synchronize business reporting and AI/ML uses
- Fixed snowflake table logic and led analysis of missing data to drive accurate data logic and storage

SKILLS

Python • SQL • Machine Learning • Technical Communication • Pandas • Statistics • PyTorch • Regression • Excel • Databricks • DataRobot • Snowflake • Database Systems • Scikit-learn • Data Visualization • Jupyter •

CERTIFICATIONS

SQL Fundamentals

DataCamp

Relational databases, filtering, joins, data analysis, SQL data types

Data Visualization with Matplotlib

DataCamp

Python, visualization techniques, time series analysis, comparative visuals

PERSONAL & GLOBAL EXPERIENCE

Intern — Undergraduate Student Intern, University of Minnesota

Fall 2026

- Contributed to solving university issues through weekly meetings to enhance affordability and overall student experience

IFSA Study Abroad — Prague, Czech Republic

Spring 2026

- Completed a semester of international coursework, gaining cross-cultural perspective alongside a global cohort of students

Principal Violist — UMN Orchestras

Fall 2023 – Fall 2026

- Lead section of 10+ violists, providing musical direction and aligning with conductor to ensure musical quality
